Bachelor of Computer Applications (BCA)

(NEP-2020)

Effective from

Academic Session 2026-2027

PROGRAMME OUTCOMES OF BCA

- PO 1** Computational Knowledge: Acquire and apply knowledge of computing fundamentals.
- PO 2** Problem Analysis: Identify, interpret and analyze computing problems using fundamental principles of mathematics, computing sciences and relevant domain disciplines.
- PO 3** Design /Development of solutions: Design, develop (coding, testing and implementation) and evaluate software solutions for computing problems, to meet specific requirements with appropriate considerations for public health and safety, in addition to societal and cultural considerations.
- PO 4** Modern Tool Usage: Create, select and apply appropriate techniques, skills, resources and modern computing tools to computational activities, with an understanding of limitations.
- PO 5** Environment and Sustainability: Understand and assess the impact of computing solutions in societal and environmental context, and demonstrate the knowledge and need of sustainable development.
- PO 6** Ethics: Apply ethical principles and commit to professional ethics and responsibilities and develop operational software for enterprises satisfying economic, social and ethical constraints.
- PO 7** Individual and Team Work: Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary environments.
- PO 8** Communication Efficacy: Communicate effectively in diverse groups about computing activities, by being able to comprehend, document and present technical information in oral and written form.
- PO 9** Project Management: Demonstrate knowledge and understanding of computing and management principles and apply these to one's own work, as a member and leader in a team to manage projects and in multidisciplinary environments.
- PO 10** Lifelong Learning: Recognize the need and have the ability to engage in independent learning, in the broadest context of technology transformation, for continual development as a computer professional.
- PO 11** Innovation and Entrepreneurship: Identify timely opportunity and using innovation to pursue that opportunity to create value and wealth for the betterment of the individual and society at large.

COURSE OUTCOMES OF BCA

After completing this course, students will be able to:

SEMESTER I

Fundamentals of Computers and Office Productivity Tools COMP-101

- CO1 Students will understand fundamental computer concepts, including hardware, software, and basic programming.
- CO2 Develop skills in creating, formatting, and managing professional documents using word processing software.
- CO3 Apply spreadsheet functions for data entry, analysis, and visualization using formulas, charts, and pivot tables.
- CO4 Utilize advanced features of spreadsheets for data validation, sorting, filtering, and importing/exporting data.
- CO5 Create visually appealing and interactive presentations with animations, multimedia, and slide transitions.
- CO6 Implement best practices for designing effective presentations and exporting them for professional use.

Programming using C COMP-102

- CO1 Understand the fundamentals of C programming, including syntax, data types, and operators.
- CO2 Implement input/output operations and control statements for efficient program flow.
- CO3 Utilize arrays and strings for data storage and manipulation in C programs.
- CO4 Develop modular programs using functions, recursion, and pointers.
- CO5 Apply dynamic memory allocation, storage classes, and structures in programming.
- CO6 Perform file handling operations to read, write, and manage data in text and binary files.

Accounting COMP-103

- CO1 Understand the fundamental principles and conventions of accounting and cost accounting.
- CO2 Record financial transactions using the double-entry system and prepare key financial statements.
- CO3 Analyze and interpret final accounts, including trading, profit and loss accounts, and balance sheets.
- CO4 Apply cost concepts, classification, and marginal costing techniques for business decision-making.

Chinani Diteka

Fundamentals of Computers and Office Productivity Tools - Lab
COMP-151

- CO1** Create, format, and enhance professional documents using word processing software, including advanced features like mail merge and document automation.
- CO2** Utilize spreadsheet software for data management and analysis by applying formulas, functions, charts, pivot tables, and conditional formatting.
- CO3** Design and deliver effective presentations using multimedia elements, slide transitions, animations, and layout customization for impactful communication.
- CO4** Apply advanced office productivity tools for document automation, data visualization, and multimedia integration.

Programming using C - Lab
COMP-152

- CO1** Develop fundamental programming skills in C, including data types, operators, and expressions.
- CO2** Implement input/output operations, control statements, and looping constructs to solve real world problems.
- CO3** Utilize arrays and strings for data manipulation and apply functions for modular programming.
- CO4** Demonstrate the use of pointers for efficient memory management and data handling.
- CO5** Apply dynamic memory allocation techniques and work with structures and unions for complex data management.
- CO6** Perform file handling operations to read, write, and manage data using text and binary files.

Foundation Course in English
AEC ENG 115

COURSE OUTCOME

Targeted at any Under-graduate student, the AEC offered here aims at imparting the theoretical know-how of the most commonly used language in the world for communication, both, personal and professional: English. The focus shall be on nurturing the theoretical framework required for a hands-on training of the various aspects of Communicating in English.

Section I a b c d Articles

Chiranjit

Internet and Web Technology

COMP-201

- CO1 Understand the fundamentals of the Internet and web technologies including protocols, web servers, and client-server architecture.
- CO2 Develop structured web pages using HTML with proper formatting, lists, tables, forms, and multimedia elements.
- CO3 Apply CSS styling techniques to enhance the visual presentation of web pages using various selectors and properties.
- CO4 Manipulate the Document Object Model to dynamically update and control web page content.
- CO5 Develop dynamic web applications using PHP with database integration and basic MySQL operations.

Data Structure

COMP-202

- CO1 Recognize and understand the usage of common data structures.
- CO2 Implement and use common data structures such as arrays, linked lists, stacks, queues, trees, and graphs.
- CO3 Analyze the various data structures and its operations.
- CO4 Evaluate problems involving simple and complex data structures

Probability and Statistics

MDC-MATH-122

- CO1 To understand the basic concepts of Statistics, its scope and importance in various fields.
- CO2 To master basic techniques for data summary and data presentation.
- CO3 To describe data with measures of central tendency and measures of dispersion.
- CO4 To distinguish between random and non-random experiments.
- CO5 To conceptualize the probabilities of events including frequentist and axiomatic approach.
- CO6 To learn the notion of conditional probability including the concept of Independent events.

Internet and Web Technology - Lab

COMP-251

- CO1 Develop interactive and well-structured web pages using HTML and CSS for styling and layout.
- CO2 Implement dynamic web functionalities using JavaScript for event handling and form validation.
- CO3 Build server-side applications using PHP and MySQL for data storage and retrieval.
- CO4 Integrate HTML, CSS, JavaScript, and PHP to develop a functional web-based project.

Chirani. Datta

Data Structure – Lab
COMP-252

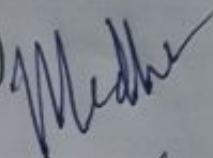

- CO1 Implement linear and non-linear data structure operations using C programs
- CO2 Solve problems implementing appropriate data structures
- CO3 Implement sorting using relevant data structures
- CO4 Implement searching and sorting algorithms using relevant data structures

Environment Education and Awareness
VAC-ENV

- CO1 To understand the importance of the environment and the various issues it faces.
- CO2 To assess students' knowledge and understanding of environmental education and awareness.
- CO3 To foster a positive attitude among students towards the environment and ecology from a social perspective.
- CO4 To develop scientific, interpretive, and creative thinking skills related to environmental issues in students.
- CO5 To examine the challenges, we encounter in understanding nature, particularly concerning socio economic solutions for sustainable development.
